

Transforming diagnostic imaging

with Dedalus and the DeepUnity Suite

Region
EUROPE

UKB, one of Germany's top hospitals, needed a unified archive to centralize medical imaging data across departments.

“Data was scattered across CDs and USB drives, difficult to access.”
- Arkadiusz Drag, Image Data Management Lead

The **NEED** for **CHANGE**

150,000+
Exams/year
needed efficient management

Isolated PACS systems

Unstandardized workflows

Difficult data access

How
DEDALUS DELIVERED

Integration
All specialties, including ophthalmology and dentistry

Universal Viewer
DICOM and non-DICOM data

Seamless Access
Imaging across all departments

“Staying within one system ensured smooth integration without extra interfaces.”

- Heiko Niggemeier, Image Data Management Lead

KEY BENEFITS

✓ Integration across specialties

✓ Universal viewer for all formats

✓ Fast data access for patient care

“We worked closely with medical teams to ensure faster access to images and reports.”

- Heiko Niggemeier

The **IMPACT**

✓ **400+**
modalities connected

✓ Seamless access across clinics

✓ Faster collaboration between specialists

Why **DEDALUS**?

✓ Proven PACS solutions

✓ Integration with ORBIS (HIS) & HYDMedia (ECM)

✓ Support for DICOM & non-DICOM data

“Staying within one system ensured smooth integration without extra interfaces.”

- Heiko Niggemeier, Image Data Management Lead
