PACSonWEB, A DEEPUNITY SOLUTION: TAP INTO THE FULL POTENTIAL OF CLOUD

FACING THE EVOLUTION OF PACS

Today, for many healthcare institutions, infrastructure and budget considerations can slow down the implementation of new technologies, but with the introduction of cloud native PACS, it is possible to add new and **innovative capabilities**, in a **cost-effective** way and with **very limited impact on IT resources and infrastructure.**

## UNLEASHING THE FULL POTENTIAL OF OUR CLOUD-NATIVE PACS

Our PACS solution allows you to distribute, share and visualize medical images and reports, over the internet, to requesting physicians and patients and across hospitals. In unison, it is a cloud archive and full-blown diagnostic PACS solution.

Clear financials

· No large investments required

· Reduce operational costs, integration and upgrade expenses

· Managed as a pay-per study model

Greater flexibility

· In meeting IT needs like hardware, software, and configuration tools

· In sharing, distributing studies, because our PACS is independent of any local infrastructure and platform

· In workflows in fact radiologists are no longer tied to location.

Enhanced security

· Create a secure back up of data, away from the primary location

CHOSE YOUR INNOVATION PATH

PRODUCT LEVELS

PACSonWEB, a DeepUnity solution uses one imaging system to organize and control the entire value chain of medical imaging, providing secure, fast and easy access to medical imaging data.

Portal
Collaborate with referring physicians, & provide patients with direct access to their studies.

Study Exchange
Share & import images with appropriate patient & study data manually or automatically, for hassle-free import & export of studies.

Archive+
Easily accessible, secure cloud-based medical archive ensures uptime & predictable costs.

Diagnostic
Full PACS functionalities, anywhere, anytime. Multi-monitor diagnostic web viewer to access, examine & report all shared patient studies across institutions.

Remote reading
Dictate a report via speech recognition (on a smartphone) while examining images on a pc or tablet.

18.500.000 +
Images processed per day

80K +
Logins per month

290
Medical imaging departments

7
Countries

Shared workflow consolidated worklists across healthcare facilities for authorized users

No installation required, **true zero footprint**

Secure & compliant by design

A **single solution** for all end users: patients, referring community, radiologists and IT

Always on the **latest version**, always up-to-date

Establish **cross-hospital collaboration**, reporting & patient timelines

Smooth lossless viewer optimized for high-latency/ low bandwidth connections

Multi-language support

Dedalus

Bringing more efficiency, flexibility and easiness in reporting solution.
