East and North Hertfordshire NHS Trust Selects Leading European EPR for UK first

East and North Hertfordshire NHS Trust has chosen ORBIS U as its Electronic Patient Record (EPR) – the first Trust in the UK to adopt the solution from Dedalus.

ORBIS U will enable patient information, including medical history, diagnoses, medications, treatment plans, allergies, radiology images, and laboratory test results to be digitised across the Trust's four hospitals – Lister, New QEII, Hertford County and Mount Vernon Cancer Centre.

Mark Stanton, Chief Information Officer at East and North Hertfordshire NHS Trust, said: "Deploying ORBIS U as our EPR is a major undertaking for the Trust and a key component of our digital transformation.

"We chose to stay with Dedalus as ORBIS U is a significant upgrade on our existing EPR solution and can be adapted to our needs."

The advanced, cloud ready EPR system by Dedalus, delivers unparalleled integration across multiple clinical processes, improved decision making, accelerated diagnoses, and superior patient support.

Roxana Bostina, Chief Clinical Information Officer (CCIO) said: "ORBIS U will give us a comprehensive patient record, built on real time data, which will in turn enable us to transform patient flow, standardise processes and reduce waste."

ORBIS U is expected to result in gains in efficiency, process optimisation, robust data security, and streamlined communication within the Trust.

Daryll Goodall, Regional Managing Director of UK and Ireland at Dedalus, said: "We are delighted to begin this collaborative endeavour with East and North Hertfordshire NHS Trust, which shares our passion for delivering affordable excellence in healthcare.

"Together, we believe that the powerful ORBIS U system will streamline processes, bolster decision making, and, ultimately, result in better patient experiences and care."

Note to Editors:

ORBIS U is the next generation of ORBIS, the EPR system developed by Dedalus, a global leader in healthcare software solutions.

With over a thousand installations throughout Europe, ORBIS has demonstrated success in driving improved efficiency and enhanced patient care through its fully integrated and user-friendly platform.

Dedalus boasts a proven track record of excellence, partnering with the NHS for over 40-years and leading healthcare organizations across the world benefiting from its advanced solutions.

EAST AND NORTH HERTFORDSHIRE NHS TRUST
At East and North Hertfordshire NHS Trust, we are proud of the range of general and specialist services we provide. Our 6,500 or so dedicated staff ensure our patients get the best care across the Trust's four hospitals – Lister, New QEII, Hertford County and Mount Vernon Cancer Centre.

ORBIS AND ORBIS U
ORBIS is Europe's leading EPR system, installed in over 1,000 hospitals across Europe, supporting more than 38.5 million patients. It is the number one EPR in Germany and France, measured by installed base.

As the newest version of the platform, ORBIS U delivers a future proof microservice architecture, device independence and a gold-standard user experience. ORBIS U is cloud-ready to support digital transformation and cloud-first policies.

ORBIS U covers all clinical and administrative use cases such as High-acuity care (including Emergency, OR and ICU), regular care (including Nursing), Medication, eHealth, scheduling and care coordination and Patient Administration through our PAS solutions. The solution is delivered with pre-configured clinical content, workflows and forms based on NICE Guidance, NHS England's Get It Right First Time (GIRFT) standards and PRSB Standards.
